

# Miracle Tooth

## Ingredients

Turritopsin™ (The Life Molecule), Colloidal Silver, Distilled Water.  
(Colloidal Silver is an anti-viral, bacterial and fungal). Miracle Tooth has no harmful chemicals and is naturally preserved in colloidal silver also shown to prevent bacterial overgrowth.

## How does Miracle Tooth work?

Turritopsin™ the Life Molecule is the active ingredient in Miracle Tooth. It is an **isolated peptide modelled on the immortal jellyfish and built out of rice proteins** completely palatable to vegans and vegetarians. Turritopsin™ mimics the powerful message of regeneration that the immortal jellyfish (Turritopsis dohrni) sends to itself.

Although we do not have the same genetic expression as the immortal jellyfish which is able to return to a younger version of itself, we can access the universal message of renewal to boost our cellular and structural functionality with incredible regenerative effects.

In essence, the cells are given the message to rejuvenate themselves which translates into improved cellular functionality, blood flow and general cellular health and integrity. To put it simply, younger cells are healthier, better and stronger cells creating healthier, stronger and more resilient teeth and gums.

Of course, brushing, flossing and rinsing your mouth out after eating sugar loaded food will help this process but if you have to choose just one innovation in your day and forget all the others, Miracle Tooth will ensure your mouth is the healthiest version of itself.

## Instructions

Spray 10 times into the mouth. Swish around for 1 to 2 minutes and spit. Use every morning. It can also be used during the day or after a high sugar intake.

## **Benefits**

Miracle Tooth improves all aspects of tooth and gum health. By diminishing plaque accumulation and bacterial growth we allow the teeth, gums and nerves to structure themselves in their optimal state. This includes reduction or complete removal of sensitivity, cessation of bleeding gums from brushing, and reparation of receding gums.

- Incredible clean feeling mouth
- Fresher breath all day
- Bacteria free
- Plaque free
- Sensitivity free
- Gum repair
- Tooth repair
- Whiter, healthier and better feeling.

## **Results from the trial**

In almost all the trial cases people reported previous tooth issues disappearing including infection, pain, general sensitivity as well as sensitivity to heat and cold, and general discomfort. Miracle Tooth has demonstrated the process of tartar removal – trial participants commented on how their teeth were beginning to look whiter.

Participants reported better breath in the morning on waking and an increase in perceived health and solidity of the teeth.

All participants in the trial reported that their mouth and everything in it felt healthier than before they started with Miracle Tooth and all of them stated beyond a shadow of a doubt that they would continue using it on completion of the trial.

An important factor to note is that dental decay has a strong knock-on effect on general health. Miracle Tooth gives our system the greatest chance to deal with potential disease as we are not fighting a low-grade war in areas we are not even aware of.

To sum up the findings from the Miracle Tooth trial, 100 percent of the participants reported smoother almost silky teeth on a daily basis as if they had just been to the hygienist.

Miracle Tooth is your all-in-one tooth solution, never live in fear of the dentist again.

Available in 100ml bottles (2-3 months supply) and 30ml bottles (1 months supply).

## Testimonials

My mouth is always fresh now and my gums are growing back slowly!!! Yayyy!  
~Alexandra Christokat~

I am so much more aware of my mouth feeling fresh and clean - makes me want to spray more often to keep the total fresh feeling in my mouth. I am also really convinced my tweeky tooth has gone forever. It just doesn't feel sensitive anymore.

~ Robyn ~

I have been away for a night and forgot my tooth brush but my teeth stayed clean!!!!!! Wow!! My teeth seem to be a bit whiter, as well. And a tooth which gives me problems, leaves me alone now! This tooth spray is a wowzer!

~Alex~

Initially, I was dealing with a troublesome toothache and a potential cavity in a challenging area where food often got stuck between my teeth. But within just two weeks of using Immortality Tooth, the pain has completely vanished, and my mouth feels refreshingly clean.

~Lize~

I just ate some frozen berries, and afterwards realized that there was no cold sensitivity

~Wilrich~

I have incredible fresh breath and I feel so reassured to be paying attention to my oral care. Miracle Tooth has really come at the right time for me.

~ Kirsten ~

My teeth are more white and they feel clean. Gums are healthy and robust. I'm excited to see what else transpires. The pain in that nerve was most definitely a 10. We were out shooting clay pigeons with my family one day and I had to come into the house (in tears) and stop the target practice as it was throbbing so bad. As I've been walking outside this winter all bundled up with hats and scarves, the pain was excruciating coming back into the house as it would thaw. It also flared up after our flight to Hawaii right after Christmas. It took a couple days to calm it down. Suffice it to say, after 4 days it is completely gone.

~Kari K~
