

DIAMOND ASTROLOGY ONLINE COURSE

MODULE 2 - THE SOLAR AXIS

Diamond Astrology

Like the Lunar Axis (Black Moon and Priapus), the Solar Axis (Black Sun and Diamond) too represents a life process of expanding consciousness of our Essential Self. The Black Moon is the solar Moon of our higher self, the Black Sun is the lunar Sun of our higher self. Both represent an important theme of how to transcend the boundaries of the personality and start to experience ourselves as creative cosmic beings.

FROM THE BLACK SUN TO THE DIAMOND - THE PATH OF THE HERO

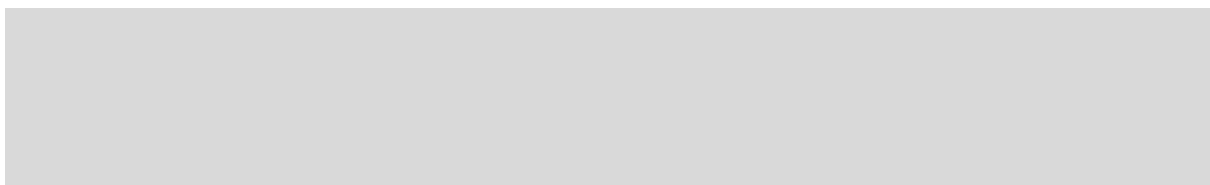

The path from the Black Sun to the Diamond is highly topical in this time of shifting from the old 3D world to the 5D new energy. The more we purify ourselves from old conditioned lunar energy and start to live from our divine inner core - The Black Moon - the more we open up to make our inner Diamond shine into this world. The Solar Axis is an enriching astrological guide on this path.
